Solutions

THE WORLD LEADER IN SOLID STATE WEATHER RADAR SYSTEMS

Custom Mobile Radar Solutions

DETERMINING THE WEATHER RADAR MOST APPROPRIATE FOR YOUR SPECIFIC APPLICATION CAN BE A CHALLENGING PROCESS.

There are countless options available. Radars vary in frequency, sensitivity, antenna and radome size, installation/mounting options, power, portability and price. Many times, there is not a standard product offering which meets all of your requirements.

For the past 20+ years, EWR has offered customers personalized radar solutions which meet all of their needs. We provide technical consultation on custom radar solutions to help design a system ideal for your application. Our experts are accessible to support you throughout the entire project.

EWR offers these key benefits:

- Available in X and C Band.
- 20+ years of custom radar solution knowledge and experience.
- Industry-leading Solid State GaN technology.
- Scalable manufacturing capabilities that meet your current and future needs.
- Minimal or no infrastructure required.
- Rapid, 10 minute deployment times with no specialized personnel required.
- Tunable transmitter frequency.
- Unmatched life-cycle support.
